

New short course in soil microbiology

We are excited to announce the roll-out of our short course on soil microbiology through the Stellenbosch University short courses division. The course entitled “Soil Microbiology in Agriculture” will be held over 2 days on 6-7 July 2023 and again on 9-10 November 2023 at the Department of Microbiology, Stellenbosch Campus.

The aim of the training session is to familiarize attendees with the complex world of the soil microbiome. The workshop will include both lectures and a hands-on laboratory session.

Topics include:

1. Microbiology 101 - brief introduction
2. The role of microorganisms in soil
3. The use and misuse of microbes in soil
4. Management practices that influence microbes

Lab session:

Important species in Agriculture
How do we assess biodiversity and function

Cost: R6500.00
